

34840 HYDRANAL™ - Coulomat CG

Reagent for coulometric KF titration (catholyte solution)

Suitability: use tested, 10 x 5 mL ampules, Reagent for coulometric KF titration (catholyte solution)

Właściwości fizyczne:

| Property | Value |
|---------------|---|
| Description | free of halogenated hydrocarbons |
| Composition | methanol |
| Compatibility | reagent for coulometric KF titration (catholyte solution) |
| Suitability | use tested |
| Boiling point | 63 °C |
| Density | 1.064 g/cm ³ |

Informacje dot. bezpieczeństwa:

| Property | Value |
|---------------|-------|
| Flashpoint | 14 °C |
| Hazard Class | 3 |
| Package Group | II |
| UN ID | 1230 |
